

Six Month Summary.

Following up on a suggestion from Chuck Davis, I am listing breeder's and their fish from the Breeder's Award Program. This will include unusual and rarer fish submitted from January 1 2008 to the end of June. You won't find guppies, common livebearers or easily bred fish here but only fish offering more of a challenge. In advance, I apologize for any spelling mistakes because I am still having problems reading the handwriting of some of our members and some of the names are not listed in any of my books.

Vince Babino
Aequidens metae
Barbus ticto
Puntius titteya

Darron Bland
Nomorhamphus beme

Chris/Jack Borgese
Aulonocara kornheliae
Haplochromis "red black scraper"

Alan de Velasco
Neoheterandia elegans

Chris Duffy
Ilyodon xantusi
Cichlasoma panamensis

Tom Gillooly
Gephyrochromis moorii
Ectodus descampsi

Jim Golaszesky
Corydoras axelrodii
C. waitzmani

Joe Graffagnino
Betta channoide

"Steve" Ivanof
Killies -- top and bottom spawners.
Peacock gobi
Paracheirodon innesi (neon tetras)

Joe Jaskot
